Abstract not available for DE69508529T

Abstract of corresponding document: **US5919510**

The method for manufacturing frozen aerated products includes the use of a device having two endless screws, identical and parallel, meshing with each other and turning in the same direction, located in a casing fitted at one of its ends with a nozzle and at the other with a device for feeding with composition to be frozen and, in an intermediate area, with a device for feeding with air, the casing being provided with a jacket in which refrigerating fluids circulate.
